

Razor XT

ISO 9001
QUALITY

The Razor XT. Tough, Rugged and Compact!

Designed for adventurers who demand toughness without compromising on style, this year's Razor XT is packed with even more features to take you further than ever before.

Now equipped with Cruisemaster XT 3500KG GTM suspension for tandem models and Cruisemaster ATX single 2750KG GTM for single-axle models, the Razor XT delivers superior handling and control. The BMPRO Sway Controller guarantees a safer ride, while the flat toolbox with integrated gas bottle and generator slides give easy access to essential gear. This year we have also added a stone guard at the front providing added protection even on the most rugged of tracks.

The Razor's bold and compact new design now features flat plates on the front, sides, and back, eliminating corrugation for a sleek, modern aesthetic. The black-framed flat access doors and flat plated black wheel spats enhance its tough, contemporary look, along with stylish double-glazed flat windows and built-in blinds.

When it comes to electronics, the Razor XT is ready for anything. Featuring a 3000W Victron Multiplus II inverter/charger, 2x 200AMP lithium batteries, and 600W of solar, this van ensures reliable power, whether you're off-grid or on the move. Staying connected is easier than ever with a Starlink RJ45 external data socket with power, ensuring high-speed internet access even in remote locations. Whether you're an experienced adventurer or taking your first big trip, the Razor XT is built to take you there in comfort and style.

Take bold adventures, never look back!
