# TOPAZ

The Track Topaz stands out from the crowd with its high levels of build quality, off road performance, comfort and compatibility.

The first Topaz was released in 2008. This design forged the way for a whole new class of off-road caravans. Today, the Topaz still leads the way with its unique styling and tough sheet metal body and luxurious interior. Its built to go anywhere the 4WD can tow it.

Recently in the 2016 at the CTA Camper Trailer of the Year awards the judges acknowledged that the Topaz Savannah Gas was outright winner in two key categories: Build Quality and Construction and Bush-ability (off-road performance). Arguably, these key points form the foundation of all Track Trailer products and provide peace of mind for the off-road traveller.

The Topaz's interior is finished with a highly durable powdercoat promoting long term use with minimal wear. Comfort and luxury are provided by genuine leather bound couches, which are shaped to give you support. The wind down blinds and stylish sliding glass windows make the living space feel modern and uncluttered. Stainless steel highlights contrast against the powercoat benches and drawers from the range hood, 4 burner cooker, sink, taps and fridge.

The Pop top is assisted by gas struts and easily lifts into place instantly increasing the feeling of space and immediately making you feel at home.

Camper Trailer of the Year Judge Michael Borg summed up the Topaz:

*"At the end of the day, this is a camper that's designed to be super comfortable, yet still be a camping trailer. After taking a close look, I reckon Track Trailer has really hit the nail on the head. Sure, it's a bit agricultural looking, but anyone with half a brain can work out that it's really built for a purpose not just to look pretty! It really is a great combination of comfort, practicality and bush-ability. So if you're not one to compromise on comfort, but still want the true-blue camping and touring lifestyle experience, this camper is really worth a closer look."*

# THE TOPAZ CAMPING ADVANTAGE

Pull up trackside for lunch and the Topaz's living space can be accessed without needing to pop the top.

The full height door features a large built-in security screen which compliments the opening windows around the bed area.

The kitchen features easy to clean, full height bench tops and plenty of usable storage in the form of slide out drawers, which are built 'military tough' to withstand corrugations.

The standard gas cooktop and grille is complimented by a permanently fixed range hood. The onboard the fridge/freezer can be easily accessed while preparing a meal.

Options for diesel cooking, hot water and heating or combination gas/electric are also available. If you prefer to cook outside the standard Stainless BBQ is extremely handy, or you can opt for a full external kitchen with twin burners, sink and pantry / cutlery storage.

\* Content of this brochure refers to both features and options available on Topaz. Please refer to specification and options list for accurate inclusions.

# MAXIMUM POP AT THE TOP

Our pop top is higher than average (at 2070mm) for better headroom and heaps of ventilation. The pop top is easy to put up and down thanks to gas strut assistance and convenient twin 'pull down' handles which work well with aligner brackets that externally locate the roof to ensure it seals first time, every time.

Full length LED lighting along the central rail with individual LED lights throughout the kitchen and bed areas further enhance the spacious and airy feel of the Topaz. Outdoor cover is easily created by our roll out awning and can be extended with the shade sail which does cover the front boot.

The annex option creates a fully enclosed room, which unlike most setups contains its own canvas roof, meaning the awning roof acts like a tropical shade to keep your living space cool.

# NORTH / SOUTH BED

The North / South Topaz bed layout is designed to be a simple answer to the need for more bed space.

By removing the wardrobe from the layout and re-distributing the storage in pods that run the length of the bed, Track Trailer can now offer a full length queen size bed or two king singles. If you don't want the storage pods the mattress can even be supplied as a full king size.

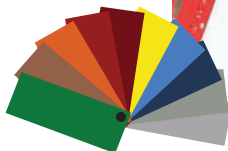

# BUILT TOUGH

The Topaz features super strong wall panels with aluminum skins inside and out which are bonded to a high density foam core. There are no exposed edges, the external panel folds inside the van preventing dust and water ingress. They provide great insulation from heat and noise.

The clever laser cut aluminum 'exoskeleton' further strengthens and locks the body panels together for unmatched performance across the harshest tracks.

Everywhere you look, all lockers and doors are built with the same twin skinned and riveted construction with compression dust seals around all lockers.

**10 HIGHLIGHT COLOUR OPTIONS  
TO CHOOSE FROM. MAKE YOUR TOPAZ  
MATCH YOUR 4WD OR PERSONALITY!**

## HUGE AND CLEVER STORAGE

When it comes to storage there's lots of clever ideas everywhere you look. The Topaz takes advantage of Track's 'waste not philosophy' with generous under-bed storage, full length overhead cupboards; full height wardrobe with 50/50 shelf / hanging space, plus cubbyhole storage throughout the cabin.

Three BIG lockers can be found outside; one locker extends across the full width of the Topaz while the other two sit forward of the wheel guard. Then there's the integrated front boot.

The passenger side is ready for a fridge with a heavy duty slide out tray and built in vents. The opposite locker is a great place to keep a generator, fuel & water jerry cans – or whatever! This boot also features custom sized storage areas for high use items such as camping chairs, allowing immediate and unimpeded access upon arrival to your campsite.

The stone guards are designed to be removed easily and can be resprayed or replaced to help make the Topaz look like new.

The storage area on the top of the boot is customisable to suit your camping style. Options include a firewood / storage rack, push bikes or 2nd spare wheel mount.

# EXTERNAL COOKING

The **standard external sovereign BBQ** features fold out trays, built in bottle opener, paper towel & tea towel holders.

The **Classic Kitchen**; stainless steel slide out kitchen and workbench features built in windshields and is located on kerb side for safe roadside access.

Its twin burners can also accommodate a BBQ plate. The sink slides out and uses an electric water pump to draw from the onboard tank. A 65 litre pantry is accessible from both sides and a large cutlery drawer slides from the front.

# SHOWER AND TOILET

The **Topaz Ensuite** is now available in two configurations:

All Topaz Ensuiteds are huge space savers and provide you with a private place to access the onboard hot water.

The **standard rear tent** which sets up in 4-5 minutes and provides a private shower space with plenty of room to store the portable toilet for long stays.

The **rear ensuite pod** is lighting fast and sets up in less than a minute! The ensuite tent is stored within the pod and is easily lowered to create a private space for your shower. It features a built-in floor with mesh sides allowing water to disperse easily. The pod features an integrated LED light, sturdy sheet metal construction and stylish rear LED tail lights.

# MAKE IT YOURS!

The Topaz offers a broad range of well-designed options which allow for full customisation so you can build a Topaz to match your individual needs.

There is a vast array of storage options, from wardrobe shelving variations to the front boot, with trays and tubs. Entertainment options include external speakers and internal TV/DVD player.

Power options include roof mounted solar, DC to DC charger and additional power outlets.

There are plenty of cooking options to choose from. A full diesel cooktop, microwave inside, and a large but compact stainless steel slide out kitchen outside.

Gas or Diesel Heating options, Air-Conditioning and 12V Fans can be fitted to suit your touring requirements.

# MC2 ASYMMETRIC LINK SUSPENSION

All Track Trailers are built on our compact and strong hot dipped galvanized chassis.

Our Asymmetric Link independent suspension is unique. It maintains wheel contact with the ground, even over severe corrugations or deep washouts, thanks in part to the tough cross link that manages bump steer.

The industry benchmark 230mm wheel travel is achieved by the custom springs & shockers, which when coupled with the front trailing arms ensure the van tracks straight behind the tow vehicle, even over the toughest terrain.

The MC2 Suspension® takes its name from the Australian Military specification.

'Mobility Category 2' is the highest performance rating for an unpowered vehicle. This remains unmatched by any other domestic trailer suspension system and delivers a significantly softer and flatter ride all round.

*"It's fair to say that this suspension is miles ahead of any vehicle on the road"*
